ABOUT US

You are reading about the adventure that a group of sailors started in 2005. This adventure was started by Onder Cesur, who has been a sailing athlete and a successful sailing instructor for many years. In order for the new generations to not experience any difficulties during their sports and coaching periods, the start of the production of high-quality products at affordable prices took place. Onder, who was born in 1969, is the father of two children and is currently a sailing club president and also a successful company owner.

Optinew has been supporting sailors since the beginning. In line with its mission and vision, it has supplied and still supplies all its products to you, dear sailors, and sailing clubs, at the most affordable prices, when compared to other products in the market. Throughout this adventure, which started with; expenses, difficulties faced by the clubs, and the absence of a supply chain, Optinew, which provided and grew its production network in a very short time, is now selling to over fifteen different countries, with over 600 different products.

Apart from offering affordable prices and quality products, it also takes part in social responsibility projects with its help and support. We are proud to be your biggest supporter in tackling the rise in prices and consumer costs today. We are very excited to work together for the future of optimist sailing. As we continue our journey with more sailing equipment and more sailors and clubs, we recommend that you follow our impact and activities closely. See you somewhere on the sea. Keep sailing and best regards...

Wind Indicator only plastic Blue

This wind indicator from Optinew Wind Indicator has a stronger vane-arm which is accurately balanced and performs amazing sensitive. The vane arm of both low friction indicators are now attached to the needle with a new positive locking system which prevents losing the vane arm.

Code:362

Code:363

Traveler Rope Dyneema Racing

Code:381

Upgrade your sailing experience with our Dyneema spliced traveler rope! Crafted with high-performance Dyneema fibers, this traveler rope offers unparalleled strength, durability, and low stretch for smooth and efficient sailing. Its expertly spliced construction ensures reliability and ease of use, making it the perfect choice for optimizing your dinghy's performance. Take your sailing to the next level with our top-quality Dyneema spliced traveler rope

Stainless steel ring

Code:386

Thickness 4cm
Inner diameter 25cm

Ring. The ring used on the Optimist sailing rope. The diamond is where the spool is attached. The binding is connected with snap plumb or caravins plumb. It is made of 316 stainless material.

Bridge small

Code:559

Stainless small bridge cleat, you can assemble to your boat for multiple purposes.

Code:430 Code:431

Plastic Shackle

These plastic shackles are designed for ease of use, high strength and ability to absorb shock loads. The screw design is stronger and permits easy detachment and re-attachment. Injection moulded from a tough nylon to absorb sudden impact loads. Shackles supplied complete with screws.

- Made of stainless steel for kicker vang

Racing Vang Ropes

Code:323

- Dyneema core rope

Protest Flag

Code:390

- Strong cord under the pocket

Stainless Steel Ring

Code:385

- 15mm made of 316 stainless steel

Plastic Cleat Red

Code:175

Plastic Pinch Red holds the rope tightly thanks to its gripping teeth.

In long-term use, the rope used may wear out. It is an affordable and long-lasting product. It is used to clamp the lower collar rope on the Optimist Boom. It is used to stretch and clamp light ropes.

Optimist Short Heel Mast Plug Plastic

Code:247

It is made of rubber with a diameter of 4.1 CM. It is suitable for use under the main mast.

Code:250

Mast Flotation Plug

Mast Cork. It is placed inside the mainmast and allows the mast to float. It allows the needle of the weather vane to be stuck. The wind vane is fixed to the main mast cork so that it does not fall into the water in case of tipping over or turning upside down. It is produced in appropriate dimensions to fit inside the main mast.

www.optinew.com

Optimist Sprit Protection

Code:255

Sprit Protection. To prevent noise and friction when the main-mast and sprit touch each other. It prevents scratches and wear. You can easily change it on your sprit with the heating process.

Vang for Racing Boom

Code:320

5MM High durability kicker (Vang) rope, perfectly works with the cleat.

"Lower Collar tension rope

Code: 330

Ready rope which perfectly for the outhaul system.

Vang with wire

Code: 325

Kicker wire, stainless steel

Optimist Wind Indicator purple
Code: 358

Wind Vane Purple Optimist. On Optimist boats and other sailing boats, it is used to fix the sail to the mast to draw a route in the main sail to see the direction of the wind. It provides convenience with its 40 cm skaver length.

Optimist Wind Indicator Blue

Code: 357

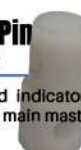

Wind Indicator Blue Optimist. On Optimist boats and other sailing boats, it is used to fix the sail to the mast to draw a route in the main sail to see the direction of the wind. It provides convenience with its 40 cm skaver length.

Wind Vane Pin

Code: 350

It ensures that the wind indicator vane remains fixed to the main mast.

Halyard Rope bottom part Dyneema Racing

Optimist Halyard system The combination of Optinew hook-in block, Dyneema spliced halyard line and Windesign low friction ring creates the most advanced halyard system on the market.

Low Friction Ring 25mm

Code:642

The use of high load, low friction thimbles where blocks may have been used in the past, has simplified areas of rig tensioning such as kicker or down-haul

Low Friction Ring 35mm

Code:645

The use of high load, low friction thimbles where blocks may have been used in the past, has simplified areas of rig tensioning such as kicker or down-haul

22mm Block

Code:646

Low-friction Micro blocks are compact and lightweight. They are ideal for sail-boards, smaller dinghies, and lightly loaded control lines on boats of all sizes.

22mm Halyard Block With Sheave And Becket

Code:647

Low-friction Micro blocks are compact and lightweight. They are ideal for sail-boards, smaller dinghies, and lightly loaded control lines on boats of all sizes.

Optinew Double Halyard Block With Sheave And Becket

Code:648

Plain bearing halyard block as used on Optimist School mast. With stainless steel cheeks, nylon 22mm sheave and becket.

Pin Double Reel

Code:649

the range uses marine grade stainless steel side plates and rivets with an arnite (plastic) sheave which is incredibly hard wearing and light. This range could be used to create purchase systems for lifting, garage door mechanisms, storage solutions etc.

Optimist Halyard System With Low Friction Ring

Optimist Halyard system with Windesign low friction ring. The combination of Optinew hook-in block, Dyneema spliced halyard line and Windesign low friction ring creates the most advanced halyard system on the market.

#PaylessSailmore

Sailing is one of the most beautiful sports in the world, and the optimist class is the most popular one-design boat. Sailing must be reachable to everyone. For this purpose, we have been serving more than a hundred national sailing clubs and more than fifteen countries over the past eighteen years. We are working hard to popularise the Optimist class and be of service to more sailors.

Whilst you, dear sailors, enjoy the breeze on the blue sea, we make sure to make your sailing life easier, convenient, and last but not least, pleasurable. From the bottom of our hearts, we thank you for trusting and choosing us, Optinew Family!

Ilca Upper Mast and Ilca Upper Mast Carbon Ilca

Code:5125, 5127

Original Laser Carbon (Composite) Crossbar. Carbon upper pole, which is quite light compared to its volume, minimizes the amount of flexing. The brittleness rate in harsh weather is higher than aluminum poles.

Ilca Boom

Code:5130

Boom manufactured in accordance with Laser Ilca standards.

Ilca Radial Bottom Mast

Code:5135

The Radial lower mast used in Laser boats comes with all connection parts. It is ready to use and produced in standard sizes. Price comes first in terms of performance.

Ilca Radial Bottom Mast ILCA

Code:5136

The original Radial 4.7 Laser - ILCA lower post comes with the original button number. Joint parts are attached to it. It is a racing model.

Ilca 4.7 Bottom Mast

Code:5140

4.7 lower mast used on laser boats.

Laser Vang Bracket Mast Attachment

Code:5145

The part that connects the tackle used on laser boats to the mainmast.

Gooseneck For Laser Boom

Code:5146

Part used to connect the mainmast and boom for laser boats.

Ilca 4.7 Bottom Mast ILCA

Code:5141

Original 4.7 Laser - ILCA lower post comes with original button number. Joint parts are attached to it. It is a racing model.

Laser Vang Bracket Boom Attachment

Code:5147

Boom connection apparatus for laser tackle. The connection is made with the trapezoidal pin at the end of the pulley.

Ilca Radial (6) Original Sail

Code:5150

Racing sail for Laser ILCA 4.7. The sail slat set is not included in the package.

Laser Radial Sail For School

Code:5170

Training and school sailing for Laser Radial. Sail window and slat set are included in the package.

Sail For School

Code:5175

Training and school sail for Laser 4.7.
Sail window and batten set are included in the package.

Full Cover For Laser Blue Fabric

Code:5253

Made of 600D breathable polyester fabric for use on laser boats.

Sail Batten Set

Sail batten set to fit all sails for Laser 4.7 and Radial boats.
Dimensions are 2x60cm and 1x40cm.

Code:5210

Bottom Cover For Laser Blue Fabric

Made of 600D breathable polyester fabric for use on laser boats.

Radial Sail Numbers Red And Black " 8 "

Radial digital sail number. Complies with Laser and Ilca standards.

Code:5225A

Code:5230A

Top Cover For Laser Blue Fabric

Code:5255

Durable and long-lasting bottom and top cover made of 600D polyester fabric used for the Laser boat. 600D polyester fabric is resistant to conditions such as sun and sea water.

Code:5235

Cover Pack For Laser

Code:5278

Full Bag For Laser Fabric

Code:5284

Keel Rudder Cover Fabric, Rudder, keel, tiller and extension sections are independent. Made of durable fabric.

Full Bag For Laser

Code:5285

Underneath rubber inflatable coverboard. There is a large pocket where you can put the rudder and keel. Also, the tiller and extension. It is supported with extra springs against the yacht. To make the construction easier to use in the sailing world.

Laser Radial Lady Symbol

Code:5250

Radial Ladies Sailing Diamond Sign

Upper Mast Cover Bag
Code:5287

Galvanised Trolley For Laser

Code:5290

Hot dip galvanizing has been applied to a 40mm square profile to be used in laser boats. It provides easy transportation thanks to its ability to be divided into 3 pieces. 2 wheels and 2 R split pins are included in the package.

Axle Part Of Trolley Laser

Code:5303

Hot dip galvanizing has been applied to a 40mm square profile to be used in laser boats. It provides easy transportation thanks to its ability to be divided into 3 pieces. 2 wheels and 2 R split pins are included in the package.

Aluminium Trolley For Laser

Code:5295

Lightweight aluminum trolley produced for the Laser boat. Provides ease of transportation thanks to its divisibility feature. 2 wheels and 2 R pins are included in the package.

Side Part Of Trolley Laser

Code:5304

The aluminum piece that the side rails of the boat sit on. It can be easily mounted to the trailer with the help of rivets.

Upper Part Of Trolley Laser

Code:5300

Trailer spare part used on the front of the laser trailer.

Polyester Daggerboard For Laser

Code:5305

It provides resistance to high forces thanks to its special foam and white outer gelcoat coating.

Laser Original Daggerboard

Code:5307

Laser original equipment.

Laser Original Rudderblade

Code:5308

Laser is original equipment.

Wedge Side Of Laser Trolley

Code:5301

Plastic equipment that connects the boat rail to the trailer.

Polyester Rudderblade For Laser

Code:5310

Laser rudder blade with special foam inside and white gelcoat outside.

Middle Part Of Trolley Laser

Code:5302

Made of 40mm aluminum square profile.

Laser Rudder Full Set

Code:5315

Laser Rudderhead

Code:5325

A part made of aluminum plates used to connect the rudder blade and the tiller used in Laser boats.

Rudder Bolt For Laser

Code:5330

10mm thick stainless bolt that secures the rudder blade used on the Laser boat with a capela.

Tiller Retaining Pin For Rudder

Code:5335

A part used on Laser boats that prevents the tiller from coming off after it is attached to the rudder.

Stainless Round Pin

Code:5340

The part used to prevent the pins from getting stuck on the ends and coming out again. 19 MM

Centerboard Stopper

Code:5342

Laser keel stopper. Prevents the keel from going down when it is attached to the boat. Acts as a brake.

W Protector For Daggerboard

Code:5345

Friction plate for laser emitting.

Parts Of Between Tiller And Rudder

Code:5350

This part is used to connect the rudders of Laser boats with the tiller. It can be mounted on the tiller with a rivet.

Aluminium Tiller For Laser

Code:5355

The tiller is made of 35mm diameter aluminum pipe. It is resistant to scratches thanks to its 20 micron anodized coating. The tiller wedge that connects it to the rudder at the back, the chrome piece on the tiller against scratches that the sling reel may create during turns, the plastic clamp used to fix the rudder, and the joint lower cover for attaching the tiller extension are the parts available on the tiller.

Protector For Tiller

Code:5360

This metal piece mounted on the tiller is mounted on the tiller and prevents the sling reel from damaging the tiller during its movement. Thanks to its curved structure, it fits perfectly on the tiller.

Saddle For Mounting Tiller Extension

Code:5362

The lower part has been designed curved so that it can be mounted on the tiller used to mount the joint lower cover, thus aiming to fit perfectly on the tiller.

Tiller Extension Iica 19mm

Code:5363

Aluminium Extension For Laser 19 mm 360 Bounding

Code:5366

Aluminium Tiller With Extension

Code:5368

Iica Original Carbon Tiller And Tiller Extension Kit

Code:5370

Original carbon tiller and extension.

Iica Original Carbon Tiller

Code:5371

Original carbon tiller

Iica Original Carbon Tiller Extension

Code:5372

Original tiller extension from the Laser brand.

Tiller Extension Aluminium 19 mm Swivel

Code:5374

Tiller extension aluminum 19mm desired shape name logo is written. The product is delivered. To inform the logo and color name, you can send information to ocesurhoca@gmail.com or WhatsApp to 05418310091. It is made as 120 cm. Manufacturing is done in the size you want.

Gudgeon

Affordable rudder gear pin for Laser boat. This part can be easily installed in the original screw holes.

Code:5380

Rudder Retaining Clip For Laser

Made of 316 stainless spring steel material. Part used to prevent laser rudder from coming off. Rudder stopper

Code:5385

Laser Stopper Bail

Stopper suitable for ropes up to 6 mm thick. Can be used in various places. Outer diameter is 20 mm.

Code:5390

Bow Eye

Made of durable plastic material. This part can be mounted on the original screw holes on the boat.

Code:5400

Block Plate For Laser

Made of 316 quality stainless material. Thanks to the fixed bridges, the steering rollers can be easily installed. This product is easily mounted on the original screw holes.

Code:5405

Code:5406

Block Plate With 20 mm Ball Bearing Block

Intermediate piece used to direct the cunningham and lower collar ropes to the locked piona system for use in Laser boats. It is connected to the base made of 316 stainless material with a 22mm pin flat pulley.

Cleat Plate

Code:5415

Cleat Plate For Cunningham And Outhaul For Laser

Code:5420

Cam Cleat

Code:5425

Cam Cleat Head

Code:5426

Plastic piece used to guide the rope during cam lock assembly.

Cam Cleat Bridge

Code:5427

Clew Starp For Laser

Code:5450

Outhall Block With's Part

Code:5475

S' Part For Outhaul

Code:5476

S hook made of 316 quality material, which is attached to the jib on the back of the sail used in laser systems.

Boom Strap Kit For Laser

Code:5520

Mainsheet Block

Code:5525

Classic Mainsheet Block With Becket For Laser

Code:5530

Gudgeon With Cleat

Code:5536

Made of 316 quality stainless steel, resistant to sea water.

Hiking Strap Adjuster Cleat With Line For Laser

Code:5540

Trapeze Strap Adjustment Lock. Allows you to perform trapeze comfortably by adjusting the length of the trapeze strap during use. Provides speed and practical use.

Cockpit Plug For Auto Bailer

Code:5550

Drain Plug

Code:5555

A plug used to drain water in laser boats. It does not leak water thanks to the o-ring in the middle.

Drain Plug Assembly

Code:5557

Water drain plug and plastic parts mounted on the boat used for Laser brand boats.

Self Bailer

Code:5560

Self bailer allows water to flow on its own inside the boat thanks to its spring system. If an internal plug is used, keeping it closed in mild weather will prevent water from entering the boat.

Wind Indicator For Ica RED

Code:5565

Wind Indicator For Ica BLACK

Code:5566

End Plug For Laser Boom

Code:5485

Code:5495

Upper Mast Stoper

Code:5500

Upper Mast Inboard Plug

Code:5510

Hard Anodized Aluminium Clamcleat

Code:5513

Boom Eyelet For Mainsheet

Code:5515

The part of the boom through which the sheet passes and prevents it from sagging. Made of stainless 316 quality material.

Wind Indicator For Ilca Blue

Code:5567

Wind Indicator For Ilca Purple

Code:5568

Shrink Tube For Traveler Blocks

Code:5590

The super strong and lightweight CSR reel can easily withstand very high forces.

Protector For Traveler Block

Code:5605

It is a product used in old sling pulleys. It is produced to prevent the big and small sling pulleys from breaking by bending at the junction point.

Classic Yang Block With Jammer

Code:5630

Classic Yang Block Small Size

Code:5632

Ilca Vang System For School

Code:5635

Tackle big reel clamp
Pin reel tail
Tackle swivel
Tackle trapezoid pin available.

Ilca Original Vang System

Code:5637

Laser original pulley system

Ilca Original Vang System Optinew

Code:5638

Vang Key Curved

Code:5645

Manufactured from 316 quality sea water resistant steel. Designed to give minimum force to the boom fixed tackle apparatus with its curved structure. The locked part on the top is designed to fit perfectly to the tackle apparatus on the boom.

Vang Swivel

Code:5650

Made of 316 quality sea water resistant stainless steel material.

Plastic Eyelet For Outhaul And Traveler For Laser

Code:5670

Small bridge where the sling rope passes at the back of the laser boat. The places where the sling rope will pass are given an extra radius to minimize deformations in the rope caused by friction.

Plastic Eyelet For Outhaul And Traveler

Code:5675

Small bridge where the sling rope passes at the back of the laser boat. The places where the sling rope will pass are given an extra radius to minimize deformations in the rope caused by friction.

Code:5717

Laser Mainsheet 6,5 mm Medium Hardness 14 m Red & Grey

Code:5718

Laser Hiking Bench Optinew

Code:5725

It is designed from aluminum sigma profiles. Thanks to its lightness, it can be easily carried anywhere you want. It will make your job easier at sea thanks to the land training you will do on the trapeze machine. It can be disassembled and assembled. It is disassembled. The wooden part is not sold.

Grab Rail For Laser

Code:5765

It is made of sea water resistant wooden material. The holes match the original lath exactly.

Mast Strapping Belt

Code:5770

Belt made of polyester and with a stainless chrome ring resistant to sea water, combining your mast, boom and topmast to carry them collectively.

Mast Float

Code:5900

Mast Buoy. It is attached to the top of the pole. It ensures that the boat does not turn upside down when it topples over.
